Skills

Languages & Framework: C/C++, Python, TensorFlow/PyTorch, JavaScript, React.js, SQL, HTML, CSS

Technologies & Tools: Numpy, Pandas, Git/GitHub, Natural Language Processing, VS Code, Anaconda, Docker

Areas of Interest: Machine Learning (Regression, Classification), Large Language Models, Deep Learning, Generative AI

Soft Skills: Leadership, Adaptability, Flexibility, Teamwork, Problem-solving, Time Management, Communication

Work Experience

Gen Ai developer, IIT HYDERBAD (SURE Intern)

May - July 2024

Research Intern

- Developed a Chatbot to promote heritage culture of India using fine-tuned open-source LLMs on a custom made dataset that shows Indian point of view to the world.
- Created features like speech-to-text in 20+ Indian languages, an OCR tool for ancient texts, an image-text to text chatbot, AI-generated 3D models from photos, and contributed to AR/VR games.
- Python, Large Language Models, Pytorch, Langchain Framework, Flask, React.js

ISRO Intern (IIT BHU)

April - August 2024

Remote Research Intern

- Contributed to an ISRO-sponsored civil engineering endeavor at IIT BHU, applying Machine Learning and Deep Learning methodologies to forecast flood flow. Implemented Large-scale Particle Image Velocimetry (LSPIV) techniques to enhance accuracy and efficiency in flood estimation processes.
- Python, Deep Learning Techniques, CNN model, Opencv

Education

Rajiv Gandhi Institute of Petroleum Technology

August 2022 - May 2026

B.Tech in Information Technology

CGPA: 9.06/10

Relevant Coursework: Object Oriented Programming, DBMS(SQL), Discrete Mathematics, Data Structures & Algorithms, Operating Systems, Machine Learning, Linear Algebra, Probability Statistics, Calculus, front end and back end languages

Project Work

- Advanced RAG Q&A Chatbot with LangChain Integration (Nov 2024):** Built a RAG-based chatbot using LangChain to optimize retrievals and streamline conversational flow, enhancing user experience. Integrated open-source LLMs, LangGraph, and Faiss to deliver precise responses with minimized latency. *Technologies: LangChain, Faiss, Lang-Graph, Open-source LLMs*
- AQI Forecasting Using LSTM and Gen Ai Models (Apr 2024):** Processed Delhi AQI data from 2020–2023, applying data preprocessing for model training. Employed LSTM and Lag-llama models for 24-hour AQI forecasts, visualizing trends in Matplotlib to aid proactive air quality management. *Technologies: LSTM, Lag-llama, Matplotlib, Python*
- AR/VR & Virtual Game Design, Space Hackathon ISRO (Jan 2024):** Developed three educational games and a 360° virtual tour of India's cultural heritage using Unity, with OpenCV-based hand gesture controls. Achieved over 90% reduction in VR costs by implementing a custom system, broadening accessibility for immersive experiences. *Technologies: Unity, OpenCV, VR systems*
- Multilingual AI Grievance Redressal System, Smart India Hackathon (Dec 2023):** Led development of an NLP-based chatbot to register and route grievances to appropriate departments, integrating RoBERTa for department recognition and fastText for multilingual support. Created a React.js dashboard for seamless departmental tracking and resolution. *Technologies: Python, RoBERTa, fastText, React.js*

Achievements

- Winner at prestigious National Level Space Hackathon(SIF) by ISRO.
- Qualified and completed the Amazon ML Summer School Program
- Achieved finalist status in the Rajasthan Police Hackathon
- Solved 150+ DSA Questions across various platforms.
- Secured AIR 20000 in IIT JEE (JEE Advance) Entrance Examination among 12 lakh students.
