Education

Amrita Vishwa Vidyapeetham, Bachelor of Computer & Communication

2021 – present

- **Courses:** Data Structures and algorithms, Machine learning, Image Processing, Web development, Networking

Skills

C | C++ | Computer Vision | Python | Java Script | HTML | CSS | Flutter | MySQL | Linux | React.js | AWS |
NLP | Tensor Flow | Hugging Face | Anaconda Navigator | Organization Skills | Initiative driven | Docker | IOT |
Autocad | Unity | Blender | Matlab | Figma | Cloud Computing | API management | OpenAI | langchain | OOPs

Certificates

- Basic C&C++ Programming, 100 Days of Python (Udemy)
- Data Science with Python (Coincent) - 4 weeks
- Reinforcement Learning (NPTEL) - 8 weeks
- Machine Learning with python (NPTEL) - 8 weeks
- 3D Modeling using Untiy & Fusion 360 [IIT Madras] - 1 weeks
- Designing & Modelling of IOT, AI, ML [STM] - 2 weeks

Professional Experience

ML Research & Development Intern, Neugence Technology Pvt. Ltd

Sep 2024 – present

- Developing the models to educate people about the latest advancements in AI, including LLMs, vector embeddings, and transformers. Focused on creating a platform for learning and staying updated with cutting-edge technologies.

Android Developer intern, AiML Campus School of Machine Learning

Jul 2024 – Sep 2024

- Developing a job search app (React Native & TypeScript) for cross-platform mobile development and smooth UI/UX, Firebase for real-time data handling (NoSQL), Django REST Framework + Allauth for authentication.

Gen Ai developer, IIT HYDERBAD (SURE Intern)

May 2024 – Jul 2024

- Developed a Chatbot(LLAMA 3.1, 32Billion, Historical data) with a visionary model (LLAVA 1.6 + OCR + RAG) and Stable Diffusion model (reconstruct Indian heritage monuments), with a front end(React, JS) & backend (Flask, Python).

Projects

Medix, OCR, Gemini, Rag ☑

Oct 2023 – Jan 2024

- Developed Medix (Google OCR technology), enhancing user convenience and reducing time by 30%, (NLP) tablet classification system, (Pratten Matching) with drug, Chemical specification

3D Face Mesh Reconstruction, Weakly-Supervised, TensorFlow ☑

Jan 2023 – Mar 2023

- Construction of 3D Mesh (ResNet-50)as the backbone network over 50 FPS in 3D face mesh generation, (TensorFlow Mesh Renderer) leveraging custom Python scripts and optimized kernel operations for efficient rendering.

Lung Cancer detection, YOLOv7-E6E

Aug 2022 – Mar 2023

- An application with OpenCV is used to detect pneumonia, cancer, blood clots, and lung damage from CT scans(80 individuals data), achieving 98% accuracy. Improved processing speed by 50% for efficient real-time medical diagnostics.

Let's Donate, Android Studios, Flutter, dart

Dec 2021 – Jun 2022

- Developed a (Flutter app) using Dart, as an Android developer with VSCode, focusing on reducing food waste by connecting donors and receivers and redistributing unclaimed food to NGOs.

Technical Foundation of Emoji Chat, C Programming ☑

Nov 2022 – Apr 2023

- Developed an Emoji Chat Platform (C programming) to leverage low-level capabilities for optimization. Implemented (encryption algorithms) for secure communication and designed a modular architecture for scalability and flexibility.

Awards

Won 2nd prize - Intel Unnati rapid Challenge, (Reward - Rs.50,000/-)

Feb 2022

Secured 3rd for Code 404 Startup, (Reward - Rs.5000/-)

Mar 2022

Honored as Top 10 - Smart Indian Hackathons, Government of Kerala

Aug 2023

Rewarded as top 6 - Atom Berg Ideathon, Techfest, IIT Bombay

Dec 2023

Acquired partnership by 2nd place, Australia Entrepreneurship (SAEC)

Apr 2022

National Finalist, IIT Madras (Synthesis)

Jan 2023

Samsung Solve For Tomorrow, Pioneers-Ranked 205th globally

Sep 2022
